Make Half-Life 2 shine again. 12 (?) GB for a mod that appearantly just changes the lightning is a littlebit too much imho.. Half Life 2 is the best PC of all time. The only game that could top it, would be Half Life 1. This update is the perfect way to experience the game again.. Well they don't make games like this anymore do they? Half Life 2 is one of the best games ever made didn't feature a minimap or any hand holding or any waypoints showing you where to go and it had AI that was ing ruthless against you. Game developers should go back and play the classics like Half Life, Doom, Quake, Goldeneye, even the original Call Of Duty. Because now we have games that are all the same they feature hand holding, AI (ghost recon wildlands) XP progression systems and even ing XRAY VISION. Half Life, Doom and any other game from this era didn't feature any of that you basically got told what to do and you was left to it. This is what Half Life 2 was all about no cutscenes, brillant story and AI that actually challenged you. Great game, shame we don't have more that are better than the same old that we have now. What has the gaming industry come to? How did we go from Doom, Quake, Goldeneye and Half Life to the games we have today which are the same old buggyu that require day one patches and dlc to finish a game off.. while i prefer the cinimatic mod by fake factory due to it making way bigger improvements in comparing the lighting graphics and textures this is still pretty good if you hate the long needless hours it takes to mod half life these days.. Really good game, a lot of fun to play, i recomend this game to anyone, its an old classic. A must have mod for half life 2 fans. I just started my playthrough of HL2 with this graphical update and don't get the negative reviews. I have played HL2 several times and this looks like a very tasteful update of the game without turning into someone it never was or wanted to be. Think of it like an old house with a fresh coat of paint, new windows, new doors, but still with the charme of the original building. This update doesn't try to turn it into a modern square building. Nothing of what I've seen looks out of place like it is often the case when modders go too far by traing to turn old games into what they think they could look like and then they screw up the art of the original. People who can't see the difference either don't start it correctly, have never played HL2 or need to get their eyes checked. It has been years since I last played HL2 and even I notice the differences. So, unless this update breaks the game later on, I give it my full endorsement and would recommend it to everyone wanting to play HL2 with a little polish. EDIT: Found the game breaking bug for me. This mod is cut for German players even if you have the uncut HL2. So, I have to take back my recommendation for German players.. Pros:- Visuals Bug fixes Cons:- Community commentary mode, who the u2665u2665u2665u2665 wants to listen to youtube gaming "celebrities"? Plebs thats' who.
